Mon, 14 Jan 2019 12:02:00 GMT differential equations and linear algebra pdf - In this section we solve linear first order differential equations, i.e. differential equations in the form $y' + p(t)y = g(t)$. We give an in depth overview of the process used to solve this type of differential equation as well as a derivation of the formula needed for the integrating factor used in the solution process.
